THE BEST USE OF GIANTSTEPS TOOLS
#MTF BERLIN HACK CHALLENGE

Tool name:

house-harmonic-filler, a harmony expert agent with MIDI I/O in Pd.

https://github.com/GiantSteps/house-harmonic-filler

Description:

The *House Harmonic Filler* is a temptative model for chord variation that could be used in contexts of live electronic music performance. Based on corpus analysis of MIDI files, it provides a framework for variation and extension of chord progressions, generating MIDI data that is sent out to the preferred device or DAW.

Operating environment:

Pd-vanilla (0.46.7) on Linux (tested on Ubuntu 16.04), OSX (tested on OSX el Capitan) or Windows.
