THE BEST USE OF GIANTSTEPS TOOLS
#MTF BERLIN HACK CHALLENGE

Tool name:
Reactable "GiantSteps" for iPad.

Description:
Reactable GiantSteps[1] is a completely revamped version of the award-winning Reactable Mobile application, which includes many new features developed within the GiantSteps project, such as advanced tonality analysis and automatic pitch correction. Like its former incarnation, Reactable GiantSteps is a full−fledged application with loop and sample players, oscillators, filters, effects, sequencers, etc. As such, it can be used as all-in-one performance and composition environment, although its syncing and recording capabilities makes it also a great tool for generating and processing material that could be later integrated in any DAW of your choice.

The following tutorial videos, provide a 15' introduction for performing with the Reactable[2]:
- Tutorial 1, Introduction: https://www.youtube.com/watch?v=I9AeUISg-Og
- Tutorial 2, Generators: https://www.youtube.com/watch?v=n1J3b0SY_JQ
- Tutorial 3, Effects and Filters: https://www.youtube.com/watch?v=yTCQc7hOsUU
- Tutorial 4, Controllers: https://www.youtube.com/watch?v=hEr0XM5VqTE
- Tutorial 5, Global Controllers: https://www.youtube.com/watch?v=NeNpHb6X_Io
- Tutorial 6, Advanced Tricks: https://www.youtube.com/watch?v=AY8iqEuE1aQ

Operating environment:
iPad Pro, iPad Air, iPad Mini >=2 and iPad 4[3].

---

[1] Temporary working prototype name.

[2] While these tutorials were meant for its big brother, the Reactable Live!, most of the concepts introduced can be directly applied to the Reactable GiantSteps.

[3] The Reactable GiantSteps application will be installed on request during the MTF challenge. Two additional preloaded iPads will also be available during the challenge.
